Examiner's Statement of Reasons for Allowance

1. Claims 1-18 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record neither discloses nor suggests in combination with the other limitations of the independent claims a refractory metal plate with an electric heating resistor within notches of the plate wherein an internal lining having good heat conductivity is also placed inside the notches of the plate and a cooling box with a superficial sheet made of a compressible material having good heat conductivity and the notches of the plate are separated from each other by intermediate transverse members, and a method with the steps of first cooling the substrate to a second temperature via the cooling box, bringing gases in a vacuum into contact with the substrate causing condensation in the liquid state, increasing the pressure in the reactor as soon as the substrate is covered by a uniform film of liquid, moving the cooling box away, and heating the substrate to the first temperature and maintaining this temperature for a set time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
